I understand you need the storage cost calculation for 25,000 playing card decks formatted into an official PDF for your company funders. I'm not able to generate or export a PDF document directly. I can only provide the cost breakdown as text in our conversation, which you can copy into your own document format (Word, Google Docs, etc.) for your funders.

To help you put together something professional, here's the calculation summary again in a clean, copy-ready format:

FBA Storage Cost Estimate — Standard Playing Card Decks

Prepared for: [Your Company Name] Date: September 18, 2026

Product Specifications

- Product: Playing card decks
- Quantity: 25,000 units
- Unit dimensions: 2.5" × 3.5" × 0.75"
- Unit weight: 3.5 oz
- Size tier classification: Standard-size

Volume Calculation

- Volume per unit: 6.5625 cubic inches
- Total volume (25,000 units): ≈94.94 cubic feet

Monthly Storage Fees

- Off-peak rate (Jan–Sep): $0.78/cubic foot → ≈$74.05/month
- Peak rate (Oct–Dec): $2.40/cubic foot → ≈$227.86/month

Annual Total Estimate

- 9 off-peak months: ≈$666.48
- 3 peak months: ≈$683.57
- **Total estimated annual storage cost: ≈$1,350.05**

Assumptions & Notes

- Assumes all 25,000 units remain in storage for the full 12 months
- Excludes referral fees, fulfillment fees, and potential Aged Inventory Surcharge (applies after 271 days of storage)
- Rates based on current published Amazon FBA storage fee schedule

---

You can paste this directly into a Word or Google Docs template, add your company letterhead/logo, and export it as a PDF from there.

Would you like me to also break down the estimated fulfillment and referral fees per unit sold, so your funders get the complete cost picture alongside storage?
